Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)	
	10/693,389	AL-MAHAREEQ ET AL.	
Examiner	Art Unit		
Jyoti Nagpaul	1743		

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 16 July 2007.

2a) This action is **FINAL**. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-4 is/are pending in the application.
4a) Of the above claim(s) 1,3 is/are withdrawn from consideration.
5) Claim(s) _____ is/are allowed.
6) Claim(s) 2 and 4 is/are rejected.
7) Claim(s) _____ is/are objected to.
8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. ____.
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892) 4) Interview Summary (PTO-413)
2) Notice of Draftsperson's Patent Drawing Review (PTO-948) Paper No(s)/Mail Date. ____.
3) Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date ____.
5) Notice of Informal Patent Application
6) Other: ____.

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Species 2 (Claim 2) in the reply filed on July 16, 2007 is acknowledged. The traversal is on the ground(s) that claims 1-3 include the limitation of specific dimension with respect to different aspects of the elements of the invention. This is not found persuasive because claims 1-3 are directed to different dimensions of a pipette shaft for holding different sized pipette tips and thus are patentably distinct species. Claims 2 and 4 are pending.

The requirement is still deemed proper and is therefore made FINAL.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: Reference numerals 8-12 in Figure 1 are not mentioned in the description. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be

notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

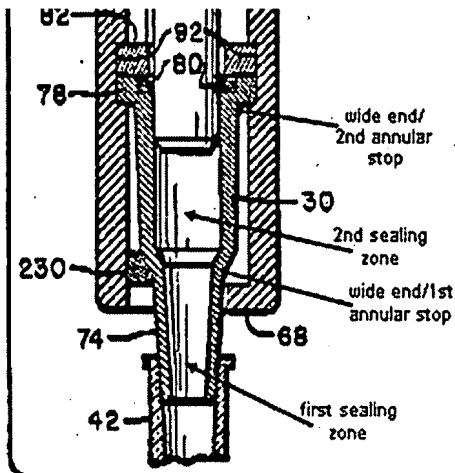

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claim 4** is rejected under 35 U.S.C. 102(b) as being anticipated by Yonkers (US 4599220).

Yonkers teaches a multi-channel pipetter. Yonkers teaches a first sealing zone comprising upper and lower ends. According to Figure 3, it appears the upper and lower ends are at an angle of 84 to 90 degrees with respect to the plane perpendicular to axis of the first sealing zone. Yonkers further teaches a second sealing zone being coaxial with the first sealing zone. The second sealing zone comprises upper and lower ends. According to Figure 3, it appears the upper and lower ends are at an angle of 84 to 90 degrees with respect to the plane perpendicular to axis of the second sealing zone. Yonkers further teaches a first annular pipette tip stop between and abutting and being coaxial with the first and second sealing zones. The first annular pipette tip stop being substantially perpendicular to the axis defining the first and second conically tapered sealing zones. According to Figure 3, the first annular pipette tip stop has an inner diameter equal to the top end of the first sealing zone and an outer diameter to the

lower end of the second sealing zone. Yonkers further teaches a second annular pipette tip stop abutting the second sealing zone. The second annular is perpendicular to the axis defining the first and second conically tapered sealing zones. According to Figure 3, the second annular pipette tip stop has an inner diameter equal to the top end of the second sealing zone.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. **Claim 2** is rejected under 35 U.S.C. 103(a) as being unpatentable over Yonkers (US 4599220).

Refer above for the teachings of Yonkers.

Yonkers fails to teach first sealing zone comprising a narrow end with an *outer diameter of 0.18 to 0.20 inches*, a wide end with an *outer diameter of 0.20 to 0.22 inches* and being *0.10 to 0.15 inches long*, to thereby form a tapered at an angle of 84 to 90 degrees with respect to the plane perpendicular to the axis of the first sealing zone. Yonkers further fails to teach a second sealing zone comprising a narrow end with *an outer diameter of 0.22 to 0.24 inches*, a wide end with an outer diameter of *0.24 to 0.26 inches* and being *0.13 to 0.17 in. long*.

It would have been obvious to a person of ordinary skill in the art to modify the device of Yonkers to provide a first sealing zone comprising a narrow end with an *outer diameter of 0.18 to 0.20 inches*, a wide end with an *outer diameter of 0.20 to 0.22 inches* and being *0.10 to 0.15 inches long* and a second sealing zone comprising a narrow end with *an outer diameter of 0.22 to 0.24 inches*, a wide end with an *outer diameter of 0.24 to 0.26 inches* and being *0.13 to 0.17 in. long* in order to create a fluid tight seal between the tip and shaft and obtain the desired lateral stability for tip on the shaft. See *In Gardner v. TEC Systems, Inc.*, 725 F.2d 1338, 220 USPQ 777 (Fed. Cir. 1984), cert. denied, 469 U.S. 830, 225 USPQ 232 (1984), the Federal Circuit held that, where the only difference between the prior art and the claims was a recitation of relative dimensions of the claimed device and a device having the claimed relative dimensions would not perform differently than the prior art device, the claimed device was not patentably distinct from the prior art device.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jyoti Nagpaul whose telephone number is 571-272-1273. The examiner can normally be reached on Monday thru Friday (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
